LIMITED WARRANTY

John Henry Software will replace your Party Songs diskette FREE if the diskette is defective, or is damaged by ANYONE no matter whose fault, if you return it, postage paid, within 90 days of purchase. We will replace it for a $5.00 fee if you return it after that.

This warranty does not apply to the programs or files recorded on the diskette. They are provided "as is". John Henry Software and our dealers and suppliers will not be liable for direct, indirect, incidental or consequential damages resulting from defects in the Party Songs programs, files, media or documentation, or for breach of any expressed or implied warranty.

Some states do not allow the exclusion or limitation of implied warranties or liability for incidental or consequential damages, so the above limitations might not apply to you.

BACKUP COPIES

We do not offer the right to copy the Party Songs disk for backup or for friends. Instead, we offer a liberal warranty and fast service when you have a problem. Please do not jeopardize the low price of future John Henry software by giving copies to your friends.

HAVING A PROBLEM?

If there is something wrong with your Party Songs diskette, we'll replace it FAST, as outlined in our limited warranty. Fast means mailing a replacement to you the day after we receive it, if we can. Return the diskette, including a note saying what is wrong to:

John Henry Software
P.O. Box 745
Vandalia, OH 45377

Before you send it back, however, try these remedies:

If you have a Commodore model 1526 printer turned on, turn it off. Then load the Party Songs again.

If the red light on your disk drive flickers while trying to read the Party Songs diskette, the drive might be out of alignment. Try another commercially-produced diskette, or execute the "VERIFY" disk command after inserting the demo diskette supplied with the drive. If the light flickers, have the alignment checked.

If other strange problems occur, turn off your computer and peripherals, remove any cartridges, interfaces, and non-standard equipment, turn the computer, drive and TV or monitor back on, and load the Party Songs again.

Don't hesitate to write to us if you have questions or comments. We're here to serve you.

Party Songs

HOW TO PLAY PARTY SONGS

Insert the diskette into your drive and enter:

LOAD "P",8,1

and press the RETURN key.

After reading the program from the diskette, which takes about a minute, the menu will be displayed, and background music will play. You may choose to play any song by pressing the appropriate letter key, or press "1" to play all the songs continuously. The menu is described in detail below, but this is all you need to know to play the Songs.

THE MENU

The menu will be displayed when the program first starts up, after a song ends (except when you are playing all songs continuously), and whenever you choose to "return to menu". Here are the menu options:

A Auld Lang Syne
B Blow the Man Down
C Oh My Darling Clementine
D Dixie
F For He's a Jolly Good Fellow
G Bill Groggin's Goat
H Hail! Hail! The Gang's All Here!
I I've Been Workin' on the Railroad
K My Old Kentucky Home
M My Bonnie Lies Over the Ocean
O Who Threw the Overalls in Mistress Murphy's Chowder?
P Goober Peas
R Red River Valley
S Oh! Susanna
T Turkey in the Straw
W My Wild Irish Rose
X The Yellow Rose of Texas
Y Yankee Doodle

1. Play all songs continuously
2. Return to menu
3. Pause music
4. Continue
5. Slow the music
6. Normal Speed
7. Speed up music
9. Stop program

When the menu is displayed, you may press a letter corresponding to a song, and the song will play. Or you may press the "1" key, and all the songs will play, one after another, until you pause ("3") or stop them ("2" or "9"). If you press "9" at any time, an "end of program" screen will be displayed, and "Goodnight, Ladies" will play.

The "continuous play" option ("1") starts with song "A", unless you have already played some songs. In that case, it starts with the song after the last one played.

The options "2", "3" and "4" are only used when music is playing. Pressing "2" will always return you to the menu immediately, even if "Goodnight, Ladies" is playing because you stopped the run. Pressing "3" will pause the music, leaving the picture on the screen. After pausing, you may press "4" to continue the song, or "2" to return to the menu.

SPEED OF MUSIC

The songs play at a "normal" tempo when you do nothing to change the speed. To slow the songs down a bit, press the "5" key. This will make them play at a slower speed, until you press the "6" or "7" key. To make the songs play faster than normal press the "7" key. To make them play normally, press the "6" key. The current speed is displayed on the menu.

SING ALONG!

The Party Songs are made to be sung along with. To make it easy, we include an introduction at the beginning of each song. The songs play within ranges of notes which are comfortable to sing.

WORDS FOR THE SONGS

Before a chosen song starts to play, the first line of verse is displayed at the bottom of the screen. As the song plays, each line of verse is displayed a beat or two before the previous line's music is finished, to make it easy to sing along.

The words are displayed on your TV or monitor in easy-to-read light gray (almost white) on dark gray (almost black). They are the same size and design as Commodore's standard characters. Both upper and lower case letters are used, because tests show that they are easier to read than all upper case.

A printed copy of the verses for all songs is included with the diskette, for your convenience.

HARDWARE REQUIREMENTS

The Party Songs require a Commodore 64 or 128 computer, a color or black and white TV or monitor, and a 1541, 1571 or compatible disk drive.

Most Commodore-compatible disk drives will work, but some interfaces will not. The Party Songs use almost all of the computer's memory, so interfaces which use some of the 64's memory will not work.

VIDEO AND AUDIO NOTES

The Party Songs sound good and the pictures look nice whether you use a TV or monitor. However, you might want to turn down the contrast and brightness a little to make the pictures look sharper. Pick a song with a picture you like, pause the music so the picture stays on, and adjust the color and brightness until you get the best picture. Then write down or remember the adjustments.

It is very easy to route the sound through your stereo or other sound system, instead of through the TV or monitor speaker. This will improve the sound significantly. However, there are so many different combinations of TV's, monitors, stereos, and amplifiers you might have that we prefer not to describe all the possible connections here. Your computer or electronics dealer can help.

COPYRIGHT
